

NuGet Migration Report - 2 UI\TradeStation

Overview

Migration to PackageReference was completed successfully. Please build and run your solution to verify that all packages are available.

If you run into any problems, have feedback, questions, or concerns, please [file an issue on the NuGet GitHub repository](#).

Changed files and this report have been backed up here: <C:\Users\W2307\source\Workspaces\TradeStation\TradeStation\MigrationBackup\1c1b9532\2 UI\TradeStation>

[Help me rollback to packages.config](#)

Packages processed

Top-level dependencies:

Package Id	Version
EntityFramework	v6.2.0
Microsoft.Bcl	v1.1.10
Microsoft.Bcl.Build	v1.0.21
Newtonsoft.Json	v11.0.2
NLog.Config	v4.5.6
NLog.Schema	v4.5.6
PostSharp	v5.0.52
PostSharp.Compiler.Client	v4.3.43
PostSharp.Compiler.Common	v5.0.52
PostSharp.Patterns.Aggregation	v5.0.52
PostSharp.Patterns.Aggregation.Redist	v5.0.52
PostSharp.Patterns.Common	v5.0.52
PostSharp.Patterns.Diagnostics	v5.0.52
PostSharp.Patterns.Diagnostics.NLog	v5.0.52
PostSharp.Patterns.Model	v5.0.52
System.Buffers	v4.5.0
System.Memory	v4.5.1
System.Numerics.Vectors	v4.5.0

System.Reflection.Emit.Lightweight	v4.3.0
System.Runtime.CompilerServices.Unsafe	v4.5.1
System.Runtime.InteropServices.RuntimeInformation	v4.3.0
System.Threading.Tasks.Dataflow	v4.9.0
TimeZoneConverter.StrongName	v2.3.0

Transitive dependencies:

Package Id	Version
NLog	v4.5.6
PostSharp.Patterns.Common.Redist	v5.0.52
PostSharp.Patterns.Diagnostics.Redist	v5.0.52
PostSharp.Patterns.Model.Redist	v5.0.52
PostSharp.Redist	v5.0.52

Package compatibility issues

Description
<p>EntityFramework v6.2.0</p> <p>install.ps1 script will be ignored when the package is installed after the migration.</p> <p>'content' assets will not be available when the package is installed after the migration.</p> <p>XDT transform file 'content\net40\App.config.transform' will not be applied when the package is installed after the migration.</p> <p>XDT transform file 'content\net40\Web.config.transform' will not be applied when the package is installed after the migration.</p>
<p>NLog.Config v4.5.6</p> <p>install.ps1 script will be ignored when the package is installed after the migration.</p>
